

# Ana

---

## Summary

---

I am 19 years old, studying construction engineering in Madrid. I've studied at a bilingual school called Las Chapas in Marbella, apart from one year in the USA. I am a responsible and kind girl, who loves spending time with children and takes the best care of them. I am very friendly, hard-working, organized and full of energy. Skilled in creating fun games and educational activities.

---

## Experience

---

### Family

I have grown up in a very large family, as my father has 7 siblings and my mother has 4. I have many little cousins that I have taken care of very often for several years. I have worked with children of various ages, starting at 8 months old.

This year in Madrid I have been helping my aunt several weekends with an 11 month old baby and a two year old.

### Utah, USA

August 2021- January 2022

I spent one year in Utah in the US. My host family had 2 children, 5 and 8 years old and I often took care and played with them.

Several afternoons, I worked as a nanny with two little twins of 2 years old. I stayed one night with them.

I also helped in the nursery at their Church most Sundays
